

PFAS statement

Dear valued customer,

At CleanMark, we take pride in offering a range of products that are designed to meet the highest standards of safety and effectiveness. We understand the concerns surrounding Per- and Polyfluoroalkyl Substances (PFAS) and their potential impact on health and the environment. Therefore, we want to assure our customers that all CleanMark labeled products are free from PFAS substances.

PFAS are synthetic chemicals that have been used in various industrial and consumer products for their water and grease-resistant properties. However, growing evidence suggests that certain PFAS compounds may pose risks to human health and the environment, prompting increased scrutiny and regulation.

Our commitment to product safety and environmental responsibility drives us to carefully evaluate and select ingredients for our CleanMark labeled products. We have implemented stringent quality control measures to ensure that PFAS compounds are not included in any of our formulations.

Furthermore, we are dedicated to staying informed about the latest scientific research and regulatory developments related to PFAS. By remaining proactive and transparent, we aim to provide our customers with confidence in the safety and integrity of CleanMark products.

We understand the importance of making informed choices for the well-being of our customers and the environment. Therefore, we pledge to maintain our PFAS-free status and uphold our commitment to delivering safe, effective, and environmentally responsible products.

Sincerely,

Cameron McKillop
